**ELTP( Entry Level training Program)**

I am applying for this program as announced on your website that the application is open! And I am passionate about taking my first step towards my successful career through applying on ELTP.

I am currently a student at University of Rwanda in my final year doing IT (Information Technology) at Nyarugenge Campus CST. I Am eager to gain experience which hopefully would help me to be successful in my Career through this Entry Level training Program.

At high school I did Maths, Computer Science and Economics. That's why I like Technology especially in the Economic sector like Banking and Financial transfer.

I am a hard worker, loving to work, problem solver, risk taker, Critical thinker, passionate on Digital skills and good at ICT Skills.

My long-term career goals are to work with a company that offers challenges and develops employees with Technology in Banking and this training would help give me the knowledge and experience I need to achieve this. It would welcome the opportunity to discuss my experience in more detail and, of course, hear more about your organization.

Regards

Claudine NIYIGENA
